Objective:

Computer Engineering student with solid programming skills and strong understanding of software fundamentals (JAVA, Python, C/C++). Passionate Computer Engineering undergraduate with knowledge of HTML, CSS, and basic backend concepts. Experienced in building small academic projects and debugging code. Fast learner, team-oriented, and eager to apply academic knowledge to real-world work through an internship.

Education:

Examination	Board	Academic Year	% Marks
Diploma Semester- III	Maharashtra State Board of Technical Education	2025-26	76.71%
Diploma Semester- II	Maharashtra State Board of Technical Education	2024-25	81.77%
Diploma Semester- I	Maharashtra State Board of Technical Education	2024-25	77.65%
SSC	Maharashtra State Board of Secondary & Higher Secondary Education	2022-23	82.40%

Projects Undertaken:

1.Career Suggestions Based On Interest

2026

Python, Functions, Nested Functions, Conditional Statements, Menu-Driven Programming

- ✓ This project focuses on developing a menu-driven Career Guidance System using Python to help students explore academic and career options after 10th, 12th, Diploma, and Degree.
- ✓ The system is designed using modular programming, where separate functions handle different education levels and career paths.
- ✓ Nested functions are used to display detailed subject combinations (PCM, PCB, PCMB) along with career opportunities in Science, Commerce, Arts, and Diploma streams.
- ✓ The application uses conditional statements and loops to process user input and provide interactive, decision-based guidance.

This project improves understanding of Python control structures and provides a practical tool for students to make informed career decisions..

2.Student Report Card System – OOP Based Project (Using C++).

- ✓ Developed a Student Report Card Management System using Object-
- ✓ Oriented Programming (OOP) concepts in C++.
- ✓ Implemented classes and objects to manage student information,
- ✓ subjects, marks, grades, and result calculation.
- ✓ Used OOP principles such as encapsulation, abstraction, and data security.
- ✓ Improved understanding of class design, member functions, and structured program flow.

3.Student Information Management System.

- ✓ Developed a basic database-driven project using MySQL.
- ✓ Implemented CRUD operations (Create, Read, Update, Delete).
- ✓ Improved understanding of database design and queries.

Certificates:

- ✓ From Learner To Builder:Become An AI Agent Architect (IBM Skillsbuild).
- ✓ C Programming Course(Infosys SpringBoard).
- ✓ Java Concepts(Infosys SpringBoard).

Skill:

➤ PROGRAMMING :

- ✓ Languages: C, C++, Python, JAVA.
- ✓ Web Technologies: HTML, CSS.
- ✓ Database: MySQL.
- ✓ Operating System: Linux (Basic Commands).

➤ TOOLS :

- ✓ Visual Studio.
- ✓ TURBOC3.
- ✓ PROGRAMIZ.
- ✓ MS EXCEL.
- ✓ MS WORD.

➤ Strengths:

- ✓ Strong logical and analytical thinking.
- ✓ Quick learner and self-motivated.
- ✓ Good problem-solving skills.
- ✓ Willingness to learn new technologies.

➤ Area of Interest :

- ✓ FullStack Developing | Data Analytics
- ✓ Python Developer | Java Developer
